VERITY

Verity captures the modern workplace — connecting with others while maintaining the valuable balance of privacy and openness.

Stand-Alone Units

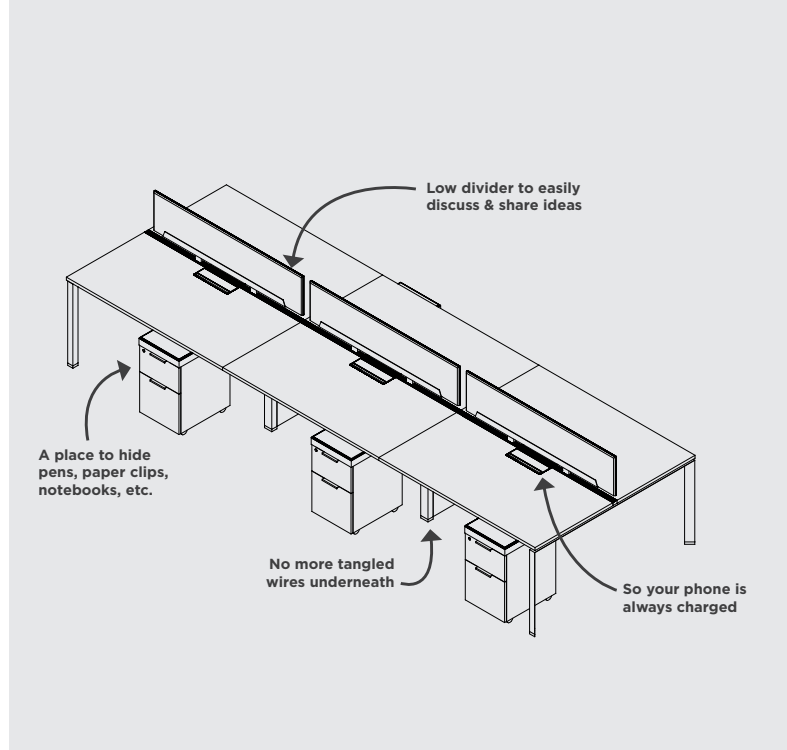

Save time with Verity Stand-Alone units, which are pre-configured stations — just add accessories and storage.

Elements, for building your own

For full customization choose Verity Elements, allowing selection of each support, surface and more including storage and accessories.

HOW DO YOU BENCH

Verity creates workspaces that welcome interactions, enhancing the workflow for teams. It's easy to share at the bench, minimizing the need to relocate for meetings.

A well-balanced open office environment also recognizes the individual's needs, particularly the element of privacy. Create visual privacy with screens available in fabric, glass and markerboard or add in space-dividing storage.

As teams grow and change, Verity can be reconfigured or expand to support new dynamics. Create a happy and productive workspace with Verity benching.

Under the Surface

Everyone loves a wire-free workspace. Stay connected by running power and data discreetly under the surface for full connectivity and a seamless look.

DETAILS

Build-in privacy with fabric, glass or markerboard screens.

Modular desk accessories, track-mounted or surface-mounted

Power/Data distribution trough organize wires away from view.

Storage elements divide space and provide additional privacy.
