# MODULAR ELECTRIC SYSTEMS

## How To Order:

1. Determine the configurations that need powered and electrical load requirements.
2. Choose **Base Feed**.\*\*
3. Establish placement of **Power Blocks**.
4. Identify **Receptacles** per power block.
5. To figure harness length, take the center of the item, where the power blocks are to be placed, plus the length of any items the harness needs to pass under. Subtract 7" and use the next larger size harness, unless measurement is exactly the size of a harness.

### For Example:

Sample #1- The power blocks are centered in the 42" Returns, so half the return size is 21" for each return (21" + 21") plus 30" depth of the peninsula, minus 7".  
 $(21" + 21" + 30" - 7" = 65" \text{ harness length})$

6. Determine needed accessories

# CHAIR MAT GUIDE

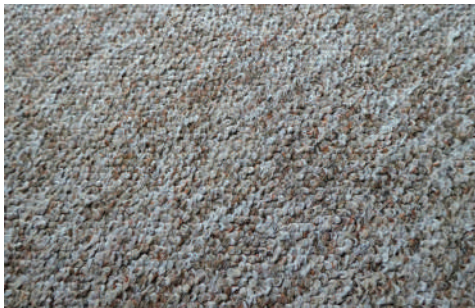

## TIPS FOR SELECTING THE RIGHT CHAIR MAT FOR YOUR WORKSPACE

Chair mats are a great accessory for your office. Enjoy a smooth rolling surface that can help reduce stress, fatigue, and floor damage from the repetitive rolling of your office chair. There are three factors to consider when choosing your chair mat:

- Floor type (carpet or hard floors)
- Size of your work area
- Best chair mat shape for your workspace

## CARPET TYPES - HOW TO MEASURE

Low Pile Carpet -  $\frac{3}{8}$ " inch thick  
- Typically found in offices

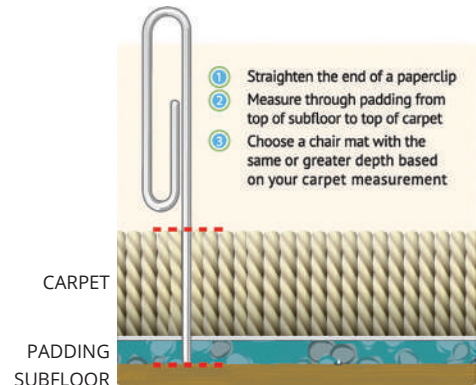

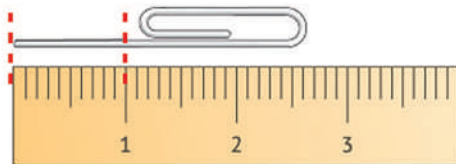

Medium Pile Carpet - Up to  $\frac{3}{4}$ " inch thick  
- Typically found in some offices and homes

High Pile Carpet - Up to 1" inch thick  
- Typically found in most homes and executive offices

Checking the thickness of your carpet is easy. First, straighten the end of a paperclip and sink it into the carpet, through the padding until it reaches the subfloor. Next, take hold of the paperclip where it meets the surface of the carpet. While holding your measurement in place, measure the distance between your fingers and the end of the paperclip. This will give you the estimated thickness of your carpet with padding included.

**Be sure that you're not matting down the carpet with your hand either.**

Once you know the thickness of your carpet, then choosing a chair mat will be easy.

## EXTENDING THE LIFE OF YOUR CHAIR MAT - CARE & MAINTENANCE

### GENERAL CARE TIPS

- Simply wipe clean with a damp cloth and mild soap if needed. Allow chair mat to dry completely before placing it on any surface.
- Ideal temperatures for vinyl chair mats are between 60° and 95°F. Do not place your chair mat in direct sunlight or in areas where moisture is present to reduce the risk of trapping dampness underneath the chair mat.

*We have chair mats available in various sizes and materials to suit your private or home office needs!*

### USING THE RIGHT MAT FOR THE JOB

- It is important that you choose a chair mat that is designed for your type of flooring.
- **Chair Mats for Carpet:** These chair mats have a cleated underside to help secure the chair mat in place. Recommended for carpet use only, do not use on hard floors.
- **Chair Mats for Hard Floors:** These chair mats have a smooth, slightly textured underside (no cleats). Recommended for hard floor use only, do not use on carpeted surfaces.
