COLLECTION

Make your space *work*

At HON, we know a thoughtfully designed workspace sets the stage for better work. That's why we exist. No matter how simple or complex, how big or small, we help businesses create an environment that makes the most of their spaces. With our decades of expertise and range of product solutions, business and organizations can be confident that HON translates today's work styles and trends into contemporary, inviting spaces that express their brand, while promoting greater productivity and well-being. This is how we deliver our promise. Today. Tomorrow. Every day. It's why we've been in business since 1944. And why businesses continue to depend on HON.

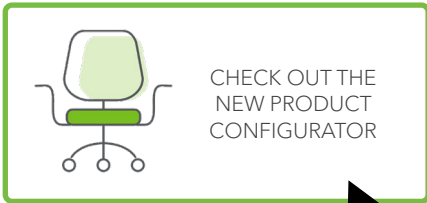

The Future is Here

There's always an exciting development in the works at HON, but this one is BIG.

Our product configurator has long been a smart and fun way to personalize your office seating, but our new development goes above and beyond: An inspiring and innovative AR upgrade with enhanced user interface that allows you to see your creation in real time, in your own space.

With this genius feature, you can obtain 3D visuals at any angle, dive into product dimensions, and explore exponential options—right from the comfort of your own home.

Discover the possibilities today!

Your Comfort
Decoded

Meet Cipher

What embodies the “perfect” task chair? In our estimation, it depends on who’s sitting in it! Aesthetics, features, ease-of-use, lumbar support—it’s all subjective and specific to an individual’s personal wants and needs. But Cipher—HON’s newest task chair—may be the key to unlocking all-day comfort and productivity.

Inspired By Design

Important client consultations. Project planning. Impending deadlines. As a busy professional, no two days are alike—how and where you sit is vital to overall productivity and healthy well-being. Cipher was designed with personal needs and desires in mind.

One of Cipher’s most noticeable and integral features is its slender seat back. Engineered to be as durable as ever but more subtle and ethereal, it’s ideal for open offices and smaller settings where an oversized chair may intimidate the space. The visual appeal of the angular design is architecturally inspired—particularly the signature armrests—with angles and edge lines that wrap around and reverse to create a seat that supports the user with elegant ease.

Customized For You

The way you sit shouldn’t just be status quo, it should be a statement! Beyond intuitive

support and essential comfort, Cipher was designed to celebrate your distinctive aesthetic. Vibrant Colorwav™ lumbar and arm accents, distinctive contrast stitch options, and a variety of other options make Cipher more than just a chair—it’s a confident expression of your personality. With finely tuned customization combined with thoughtful engineering, Cipher—also available as a guest chair—offers any space style and substance.

A Supportive Helping Hand

Cipher’s biggest secret? Its innovative lumbar support. This seating solution’s open-back lumbar can be adjusted independently on each side for both height and pressure, offering a unique sit and fit and truly personalized experience. Complemented with weight-activated settings and integrated controls that are nearly invisible instead of intrusive and clumsy, it’s a dynamic multitasker from your first cup of coffee to the last meeting of the day.

2022 Standouts

Of course we love our designs, but when independent industry reviewers love them too, it's cause for celebration. Our chairs have gotten several awards this year—take a look at what they're saying!

NeoCon **Best of 2022: Cofi Conference Seating**

Since 1969, NeoCon has served as the world's premier interior design event. From the vast array of products and providers, a highly select group of "Best of" show products are named. This year, HON's Cofi seating line was awarded the highest level of recognition: Gold.

Wirecutter **Pick: Ignition 2.0**

Ignition 2.0 task chairs have vastly improved the work lives of people nationwide. And The New York Times' Wirecutter took notice, naming HON's top selling seating solution as its "Best Budget Pick" of 2021. Noted for being one of the most comfortable chairs they've tested, Wirecutter also praised Ignition 2.0's adjustment features and supportive lumbar support.

Forbes **Best Overall Office Chair: Ignition 2.0**

Forbes magazine also reviewed a lengthy list of task and office chairs recently, and chose Ignition 2.0 as their top pick of workplace ergonomic superstars. Dubbed "Best Overall Office Chair," a Forbes editor described it as a "cool, perfectly contoured chair at a very reasonable price."

Global Design News & The Chicago Athenaeum Museum of Architecture and Design **Best Office Chair of the Year: Cliq**

"Instant comfort for collaboration," is how Cliq was defined.

A woman with dark curly hair, wearing a purple sweater and a floral skirt, is sitting at a white table. She is smiling and looking to her right. On the table in front of her is a laptop, a notebook, and a small potted plant in a decorative container. The background shows a window with greenery outside. A large graphic on the left side of the page features the word "Tables" in white text inside a dark red circle, surrounded by a pattern of small dark red dots.

Tables
